

# ONSHORE SERVICE OVERVIEW

# WHO ARE WE?

A division of Southey Mauritius Ltd, a leading group of engineering companies and industrial service providers specializing in the delivery of full turnkey solutions to clients in the Industrial, Marine, Offshore and Energy Sectors.

Established in 1939, Southey contracting offered industrial painting and contracting services to both the mining and heavy industries in South Africa. Since then, Southey's Offshore Division was created, which now supplies specialist Maintenance, Corrosion protection, UHPBW, Access, Inspection, Integrity and Manpower services to the Oil and Gas, Power Generation, Petrochemical, Mining, Marine and Energy sectors in Africa and beyond.

# SERVICE OFFERING

Southey Contracting provides solutions to improve, maintain and protect their clients plant and assets by providing specialized, innovative, and mobile solutions to their customers utilizing strategic alignments and drawing from expertise gained through decades of experience.

Southey have built the capacity to support the continents expansion in the energy sector. Having up to 500 diverse and highly skilled people employed in the various countries of operation, we are primed to provide our clients with solutions.

Our footprint allows us to mobilize our multi-disciplined teams swiftly and efficiently in order to meet our client's requirements, and in line with our business philosophy we strategically place equipment in our operating regions which allows us to provide a quick turn around on contracts that we secure throughout Africa.

# SERVICE OVERVIEW

## FABRIC MAINTENANCE

Corrosion protection & Coating services  
Abrasive Blasting services  
HP & UHP water blasting services  
- Deck Blasting & General UHP Surface Preparation  
- Automated Blasting (Crawler & Track Blasting)  
HP & UHP Industrial Cleaning  
- Pipe & Tube Cleaning  
- Tank Cleaning  
Cold Cutting  
Wrapping solutions  
Insulation / Lagging  
Fireproofing  
Steel fabrication, Modifications  
& Replacement  
Riding squads (Mechanical, welding, electrical)

## ACCESS

Scaffolding / Staging services  
Rope access solutions (IRATA)  
Rigging solutions & Loft management

## INSPECTION

NDT services (UT, ECI, MT, PT, PAUT, EMAG) (ABS)  
Hull & Tank integrity inspections (ABS)  
Lifting equipment inspection (LEEA)  
Dropped object surveys (DROPS)  
E & I inspections (EX)  
Crane inspections (API)  
Load testing  
Gas detection equipment - Inspection & Calibration  
Valve, Gauge & Sensor - Inspection & Calibration  
Thermographic, Lux & Noise surveys

## **INTEGRITY**

Asset assessment and monitoring (GDI)  
Coating inspection & Corrosion assessments (NACE)  
Valve & Flange Management  
Pressure & Nitrogen leak testing  
Bolt Torquing, Tensioning and Replacement  
Motor Condition Monitoring

## **PERSONNEL**

Personnel Recruitment Services  
Marine Crew Assignments

## **SUPPORT**

Equipment Rental  
Materials Sourcing  
Controlled Work Environments  
(Safehouse)  
Cold weld connections (Lokring)

# CERTIFICATIONS

ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018 | ABS | WJS | IRATA | DROPS | LEEA

# STRATEGIC PARTNERS

GDI

Global Design Innovation Ltd (GDi) is a technology and engineering services provider specialising in providing innovative solutions for asset-intensive industries. The company's core offering, Vision, is an integrated, agile, and **cloudbased asset management solution** that enables asset owners to digitalise their processes and assets, creating greater operational efficiency.

Vision is built on a foundation of cutting-edge technologies such as laser scanning, machine learning, and AI. The platform's capabilities include **advanced 3D modelling, digital twin creation, and asset management**, which allows asset owners to streamline their operations, optimise performance, and improve overall asset lifecycle management. The platform is highly **scalable and customisable**, which allows it to adapt to the specific needs of asset owners in different industries.

PINNACLE INSTRUMENTS

Pinnacle instrumentation focuses on providing principal **field instrumentation solutions and calibration services** to Process Instrumentation, Pressure Relief Valves and Gauges.

We have partnered with manufacturers that are defined as world leaders in their field of application and our products provide reliable and sustainable long-term measurement and control, all whilst our field teams provide innovative and passion-driven engineering solutions to meet your every need.

The combined service offering of industry **versed technicians, mobile calibration equipment and strategic partnerships** allow for a rapidly respond with industry leading solutions, on a global scale.

LTP SOLUTIONS

LTP Solutions Pty (Ltd) is an owner-run organisation with a global footprint and a meticulous focus on service delivery and safety. We provide our clients with a full spectrum of **pressure testing services, ranging from pre-engineering to commissioning, repairing and certification.**

We too have aligned with strategic partners to source for our clients the highest quality products. We prioritise safe start-ups, on-site efficiencies, and cost-effectiveness. Our specialised services include:

- Nitrogen / helium leak testing
- Nitrogen purging
- Hydrostatic testing
- Pneumatic pressure testing
- Hydraulic bolt torque and Flange management

## STRATEGIC ALIGNMENTS

LOKRING

LOKRING produces one of the **most advanced fluid and gas transfer connectors** currently available. It is a mechanical method for producing permanent weld equivalent pipe connections (Cold weld), can be applied in the field and **eliminates the need for hot work** and the associated health and safety issues.

It is consistent with engineering practice in the design and construction of piping and tubing systems up to 4" dia.

SAFEHOUSE

The Safehouse Habitats product offering includes a range of hot work **pressurised welding habitats** which control environments to achieve safe working conditions.

SAFEHOUSE habitats enable hot work, such as welding or grinding, to be undertaken on an oil or gas facility whilst it is operational and with the associated risk of flammable hydrocarbon gases in circulation – thus maintaining production and **minimising the cost implications associated with shutdowns**.

## REGIONAL PRESENCE

Southey Contracting thrives on expansion and has been able to extend its footprint to operations in 9 sub-Saharan countries. Our footprint allows us to mobilize our multi-disciplined teams swiftly and efficiently in order to meet our client's requirements, and in line with our business philosophy we strategically place equipment in our operating regions which allows us to provide a quick turn around on contracts that we secure throughout Africa.

We have incorporated companies in our countries of operation, thereby allowing our international clients to capitalise on our local content offering and we commit to local partnerships and ongoing training and development programmes for local personnel. In doing so we add to the development and upliftment of the communities in which it operates. The company is currently well established with offices, staff houses and warehouses or workshop facilities in Ghana, South Africa, Namibia, Ivory Coast, Mozambique, Angola, Senegal and Mauritius.
